

Life-changing books by Richard Gentle

How We Perform Negative Miracles

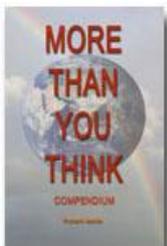

An introduction to the Law of attraction (with images and illustrations). This booklet explains how we all experience daily miracles – but rarely acknowledge them! Gain the knowledge you need to become more conscious of your ability to create the life you desire!

More Than You Think

(Black or yellow cover – **same content**)

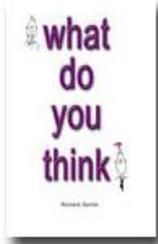

This book explains why you are here on the Earth in physical form, using the analogy of a game you have chosen to play. It also explains that each individual is responsible for his/her experience of life on the planet. A very empowering book that removes blame and gives you the power to make positive decisions about the life you lead.

More Than You Think (Compendium)

A special edition of 'More Than You Think' that contains the text for Negative Miracles, a little from 'Quantum Mass Superstructures', and also a special section on Raising Vibration.

Life-changing books by Richard Gentle

What Do You Think?

The latest edition of the 'More Than You Think' work. This book contains most of the information in the compendium book but, in places, has been re-written and up-dated. Richard asks the question: What do you think? Because, what you think about, and how you react to your thoughts, directly affects your experience of life.

Crystal Wand Healing

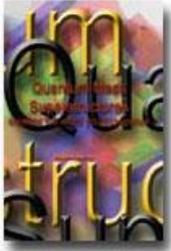

A booklet about healing and the amazing benefits of using a Crystal Wand. A 'must read' explanation of health for everyone. (Includes full instructions on making and cleansing a Crystal Wand).

What Ever you Think

A handbook of direct quotes from three off-world entities: Seth, Abraham, and Bashar. Never before have the most important quotes, about life and our experience, been brought together in one place. (Quotes are in italics for ease of access and these are accompanied with commentary by Richard Gentle).

Quantum Mass Superstructures – Creating the world you experience

QMS is a book about how people create physical reality from conscious thoughts and actions. It sounds highly scientific, but don't worry, it is written for anyone to read easily.

If you ever wondered how the physical universe came into being – and you don't believe that the 'Big Bang' came first – then you will enjoy this book.

Deliberate Creation - a pocket guide to successful manifesting

Areas covered:

Law of Attraction

**You experience the reality that
you create**
